

MANAGED BY
CHANGI AIRPORT GROUP (SINGAPORE) PTE LTD

**CHANGI AIRPORT GROUP (CAG)'S
ENVIRONMENT POLICY**

Environment

Each User shall adhere to all applicable environmental related legislation of Singapore while carrying out its activities in the Airport. Users who engage subcontractors to carry out works on its behalf are to ensure that the latter comply with such legislation. As part of CAG's efforts to minimise pollution and conserve resources, Users are also required to comply with the requirements set out herein.

Users shall cooperate with CAG in minimising pollution and conserving resources while carrying out works in the Airport. Wherever necessary, Users may at times be requested by CAG to furnish relevant environmental related data or information of its operations to assist in the monitoring of CAG's environmental performance.

Waste & Recyclables

1. Users are to separate recyclable waste into the specified categories so as to enable recyclable waste including materials such as paper, cardboard and plastic, to be properly recycled.
2. Users are to keep the Airport's premises free from accumulation of waste materials. Upon completion of any works that results in general and/or toxic industrial waste, a licensed waste contractor shall be engaged by Users to remove promptly from all premises all surplus and waste materials and debris. Small quantity of general waste however may be disposed of at the Airport's appropriate waste bins.
3. Users who dispose of waste themselves are obliged to provide suitable containers at their own costs for separation and storing of recyclables. Users disposing of waste themselves are required to provide the amount and produce monthly receipts for the amount of the general and/or toxic industrial waste disposed and recyclables collected, when requested by CAG.
4. Users are to ensure there is no discharge of oil, chemical waste, sewage or other toxic substances into any drain or land. Users are to be responsible for the clean-up of any discharge or spillage of any oil, chemical waste, sewerage or other substances in the Airport, in accordance with the proper procedures as required under applicable laws, rules or regulations or by CAG.
5. CAG reserves the right but is not obliged to audit the Users to ensure that chemical and/or general waste are properly disposed in accordance with the applicable laws, rules or regulations. The right to audit does not in any way absolve the environmental liabilities and responsibilities of the Users as set out in this Contract or under any applicable laws, rules or regulations.

Water

1. Users are encouraged to install water saving fixtures to reduce water consumption. Where potable water is not required, Users are encouraged to use industrial water where the requisite piping is available.

Energy

1. Users are encouraged to opt for energy-efficient products when procuring devices, machinery and lighting for their renovation and business activities. CAG reserves the right to request for modifications should any existing fixtures be considered to be excessively inefficient with the advent of new energy-saving technologies.

Chemical Handling

1. Users are to furnish a Material Safety Data Sheet (MSDS) for any industrial chemicals (if applicable) to CAG before delivery or transport to, or use at the Airport. For any subsequent delivery or use of the same chemical substances, no MSDS is required unless there are changes in the MSDS. Users are required to forward any revision to the MSDS to CAG within 14 days of such revision.
2. Users are to provide necessary control measures in order to prevent environmental pollution, e.g. secondary containment for storing chemical containers, spillage kit for responding to minor chemical spillage, documented specific environmental control procedures etc.
3. Where available, Users are encouraged to use environmentally-friendly chemicals for their activities including cleaning and washing.
4. Separate conditions in accordance with statutory requirements apply to the handling, transport, treatment and storage of hazardous goods and substance. Goods and substances that present a fire or explosion hazard, combustible liquids or gases, radioactive substances chemical or other environmentally hazardous goods and substances have to be stored in dedicated containers, lockers and rooms and protected from unauthorised access.

Air Quality

1. Users shall ensure that there is no continuous emission of black smoke from vehicles or other petrol/diesel driven equipment in the Airport.

Communications

1. Users shall inform their employees and subcontractors about CAG's requirements set out in this Schedule.
2. Users shall give immediate notice of emergency incidents (e.g fires, chemical spills) to the Airport Emergency Services at 6481 3377/1246.
3. Users shall participate in the emergency response drills conducted by CAG.
4. Emergency contact numbers are to be made readily available and communicated to employees and subcontractors of Users.
5. Users shall report any incidents that lead to negative environmental impact to CAG.

6. All specialised machinery and equipment brought into the Airport shall be tested and certified by the relevant authorities (where applicable).
7. Users shall deploy competent and trained personnel at all times and produce relevant authorisation certificate(s) related to the work activities of its employees upon request by CAG.
